Jakarta, Indonesia (Open for Relocation)

Summary

Jefta Supraja is a fresh graduate in Informatics Engineering from Universitas Pembangunan Nasional Veteran Jakarta with a strong interest in full-stack web development. He has built end-to-end web applications across frontend and backend, integrating both relational and non-relational databases. He also creates product and visual prototypes, has exposure to game development, and showcases a consistent project track record on GitHub. Known for being persistent, responsible, collaborative, and highly curious.

Professional Experiences

Marketing Communication **Aug 2023 - Jan 2024**
Gerakan OK OCE Indonesia Jakarta, Indonesia
OK OCE Indonesia is a social movement focused on job creation through entrepreneurship and community-based economics. It aims to foster independence and generate widespread employment opportunities for the people of Indonesia.

- Designed visual content and managed social media materials as Graphic Designer and Content Creator for OK OCE platforms, increasing engagement rate across channels.
- Edited and produced the official company profile video, enhancing corporate branding and stakeholder presentation quality.
- Collaborated in planning and organizing in-house events at OK OCE Office, resulting in improved internal communication and community engagement.

Software Engineer **Oct 2025 - Now**
PT Digital Lintas Dunia Tangerang, Indonesia
Software development and digital technology companies focused on developing and delivering software-based digital platforms and solutions.

- Developed the frontend of a **real-time messaging platform**, integrating REST APIs and implementing authentication, data handling, validation, and error handling.
- Developed and integrated a **payment management dashboard** for a QRIS-based payment system, enabling transaction monitoring and management through API integration and script-based integration.
- Developed and maintained **administrative dashboards** for platform management, including user management, data visualization, and operational workflows.

Certiport	Information Technology Specialist – Data Analytics
Oracle Academy	Java Foundations – Final Exam Completion
BNSP (UPNVJ Certification)	Sertifikat Kompetensi Asisten Program – Certificate V
OK OCE Indonesia (Kampus Merdeka)	Website and Social Media Developer (Internship Program)

Projects & Achievement

Pesonal Projects

- **JD'Sign**
  Developed a fullstack e-commerce marketplace application, designed to sell custom design products created by me. The backend, built with Node.js and Express, provides secure APIs for user authentication, product management, and payment processing using Midtrans. The React and Vite-based frontend offers a responsive and user-friendly interface for browsing and purchasing designs, managing carts, and accessing admin dashboards. The project emphasizes security, scalability, and modern development practices, deployed seamlessly on Vercel.
- **MyListAnime**
  A web app for tracking anime, writing reviews, and viewing public ratings. Tech Stack: HTML, Tailwind CSS, JavaScript, Express.js, PostgreSQL (PGAdmin)
- **MyPresenceSystem**
  A facial recognition and geolocation-based student attendance system. Tech Stack: Next.js, Tailwind CSS, Python Flask, MTCNN, MediaPipe, FaceNet, KNN, Firebase Auth & Firestore
- **Spotiflow — MERN Spotify Clone with Admin**
  A full-stack music streaming app built with the MERN stack. Includes an Admin Panel for uploading and managing songs, artists, and albums, plus a Spotify-like frontend for users to search, play, and manage playlist
- **Portfolio + Project Management System (MERN)**
  Built an admin dashboard to add/manage projects that auto-publish to a portfolio site. JWT auth, project CRUD, Cloudinary image upload, GSAP animations, Spline 3D integration. Tech: MongoDB, Express, React, Node.js, Tailwind, GSAP, Cloudinary.
- **Discorvo - Web Like Discord**
  A full-stack JavaScript group chat platform featuring real-time chat, payment processing, and group-owner fund controls—powered by React, Express, PostgreSQL, Pusher, and Midtrans.
